

# BASIC ADDITION

## Maths Notes for 1st Standard Kids

---

### PAGE 1: WHAT IS ADDITION?

#### Meaning of Addition

Addition means **putting things together**. When we add, the number becomes **more**.

👉 Example: If you have **1 apple** and get **1 more apple**, then you have **2 apples**.

So,  $1 + 1 = 2$  🦻

---

#### The Plus Sign (+)

The sign + is called **plus**. It tells us to **add**.

👉 Example:  $2 + 1$  means **add 1 to 2** 😊

---

#### Addition Using Objects

We can add using toys, fruits, pencils, or fingers 🖐️🖐️.

👉 Example: You have: 🐱🐱 (2 toys) You get: 🐱 (1 toy)

Count together: 🐱🐱🐱 = **3 toys** 🐱

So,  $2 + 1 = 3$

---

#### Addition Using Fingers

Let us add using fingers 👍

👉 Example:  $3 + 2$

Show 3 fingers 🖐️🖐️🖐️ Show 2 more fingers 🖐️🖐️

Count all fingers: 1, 2, 3, 4, 5 👉

So,  $3 + 2 = 5$  😞

---

### Easy Additions to Practice

•  $1 + 1 = 2$  😊 •  $2 + 1 = 3$  😊 •  $2 + 2 = 4$  🐱 •  $3 + 1 = 4$  👂

---

## PAGE 2: ADDITION MADE FUN

### Addition with Pictures

👉 Example: 🍏 + 🍏

Count all apples: 🍏 + 🍏 + 🍏 = 3 apples

So,  $2 + 1 = 3$  😊

---

### Count and Add

Always **count slowly** and **carefully**. Start from the **bigger number** and count forward 😊.

👉 Example:  $4 + 2$

Start from 4: 5, 6 😊

So,  $4 + 2 = 6$  👂

---

### Fun Addition Rhyme

👏 One and one make two, Two and two make four, Add the numbers nicely, Maths is fun galore! 👏

---

### Zero in Addition

Zero means **nothing**. Adding zero does **not change** the number.

👉 Example:  $3 + 0 = 3$   $5 + 0 = 5$

Zero is a **quiet number** 😊 😊

---

## Let Us Try!

 Add and say the answer:

  $1 + 2 = \underline{\quad}$    $2 + 3 = \underline{\quad}$    $4 + 1 = \underline{\quad}$    $5 + 0 = \underline{\quad}$

---

## Remember

 Addition means **more**  Use fingers or objects  Count happily 

 Maths is fun when we add with joy!
